Solutions - ETH Zürich - Homepage | ETH Zürich

3. A signal $w[n]$ is generated by drawing independent samples from a Gaussian distribution with zero mean and variance 4. Calculate the expected power of $w[n]$ in the frequency band $[0; \omega = 2]$. (2 Pt) 4. The magnitude response $|H(\omega)|$ of a continuous-time LTI system is defined as follows: $|H(\omega)| = 1$ for $0 \leq \omega \leq 1$
