Syllabus For The Course Information Theory And Coding  
Information Theory Is Concerned With The Fundamental Limits Of Communication. What Is The Ultimate Limit To Data Compression? E.g. How Many Bits Are Required To Represent A Music Source. What Is The Ultimate Limit Of Reliable Communication Over A Noisy Channel, E.g. How Many Bits Can Be Sent In One Second Over A Telephone Line.

We Could Make Our Message More Reliable By Sending 11 Or 111 Instead, But This Vastly Decreases The Efficiency Of The Message. Claude Shannon Attacked This Problem, And Incidentally Established The Entire Discipline Of Information Theory, In His Groundbreaking 1948 Paper A Mathematical Theory Of Communication. But What Does Information Mean Here?
