Satellite Orbits - University Of Toronto Recall The Equation Describing An Ellipse Which Is Centred At The Origin Of The X-y Plane: $\frac{x^2}{A^2} + \frac{y^2}{B^2} = 1$, With $A > B > 0$ However, It Is More Convenient To Move The Coordinate System Such That The Origin Is At The Focus (i.e., The Earth), So That $\frac{x^2}{C^2} - \frac{y^2}{P^2} = 1$ We Can Show (!) That The Equation For The Ellipse, When Converted To Polar ...
